| <b>Role</b>        | Programme Manager   | <b>Description</b>  |
| <b>Reference</b>   | JO012326  | <p>This role Programme Manager role involves managing the delivery of Solutions Delivery programmes/projects on time, within budget and to agreed functionality and quality. Managing the portfolio of projects which fall within the area of responsibility, tightly control finances, highlight and mitigate risks, own the Change Management process, communicate status and metrics. Managing the selection of Application Development Framework partners as required, taking the lead in the RFP process, and subsequently manage the chosen partners to deliver programmes/projects within the area of responsibility. You'll work with the Project Management Office to ensure maximum efficiency in the allocation of common resources, skills and technologies across IS programmes and projects.</p> <p>In essence, I am looking for a Programme Manager with a proven track record of managing the successful (to time, cost and quality) development of major programmes and projects. We are talking about in excess of 10 Million pound budgets (ideally 30 Million plus!) You'll have a proven track record of selecting third party systems integrators, taking the lead in the RFP process , including</p> |
| <b>Location</b>    | City of London, England   |   |

offshore delivery along with an excellent understanding of the interactions between people, processes and technology with excellent interpersonal and negotiating skills, with the ability to influence internal and external stakeholders to achieve results. It is also important to demonstrate good consulting and relationship management skills and an ability to work comfortably at all levels of the organization whilst managing and motivating matrix teams. This will need excellent verbal and written communication skills, good prioritization and delegation skills and the ability to take people through structural, procedural and cultural change and gain commitment to new models of working.
